Several Scouts under the leadership of Scoutmaster Keith Love took in the Scout Jamboree and weekend camp at Calgary.

GAMBLE NEWS

Friends and neighbors of the Mount Vernon area held a farewell party Friday night in honor of Dave Anderson and family. They were presented with a large fitted picnic and the good wishes of those present.

Leona Rempfer was visiting at her parents' home over the weekend.

The Gamble Ladies' Aid held their March meeting at the home of Ethel Halstead.

Buddy Anderson has spent the last two Sundays at home.

There will be a community shower for Joyce Anderson in the Legion Hall March 18th.

The Gamble Community Club will hold a card party and dance on Friday March 20th.

I.O.D.E. BURSARIES

The Provincial Chapter of Alberta, Imperial Order Daughters of the Empire, announce that 30 bursaries of \$1600.00 each are being offered across Canada under the Second War Memorial.

These bursaries are awarded to Grade XII students eligible for University entrance, whose father or mother, having served in His Majesty's Forces during World War II, suffered death or permanent disability.

As a Candidate for Hospital Board Member in the Drumheller Area of Kneehill Municipality, I would appreciate the opportunity to acquaint the voters of this area with my endeavors in their behalf during the last four years as well as prior thereto.

In the latter part of 1954 the Municipal Council appointed me your Hospital Board Member to complete the unexpired term of my first husband John W. Olson who passed away in 1954. I have since held this position either by acclamation or appointment.

As Constituency Convenor for the Alberta Women's Institutes and long before I was a Hospital Board Member, I was instrumental in securing a sizable reduction in the rates charged by the Hospital for isolation cases. In addition I worked long and hard to persuade the local Doctors to offer Medical Contracts to anyone wishing to purchase such protection. Formerly only miners could obtain a contract for medical care. Now anyone can secure this protection. Thus when I was appointed Hospital Board Member I felt I was well qualified to serve.

Since then I have endeavored to do my duty to the best of my ability. I constantly endeavored to explain the regulations to patients and laymen so that anyone requiring Hospitalization would be familiar with the rules and regulations by which hospitals are governed. Unfortunately some patients were penalized for failure on their part to get proper referrals before applying for admittance to another hospital. Of course all this is now done away with and since April 1958 one may be admitted to the hospital of his or her choice.

All this does not mean that your Hospital Board Member has no work to do. Operating costs must still be dealt with. Likewise personnel and labor problems must be properly handled together with operating costs.

I feel that I am well qualified to continue to serve as your Hospital Board Member and shall therefore appreciate the support of the voters March 23.

With the ever changing hospital regulations it takes some time for a Hospital Board Member to grasp the facts, and so it is beneficial to all that continuity be maintained on the Hospital Board.

Mr. H. C. Currie of Orkney District is the opposing candidate.

MYRTLE ROBERTS.

RE-ORGANIZATION OF 4-H FIELD CROPS CLUB

The projects in the Field Crop Club have been completely re-organized. There is, under the new regulations, a Junior Project for members 12-13 years of age; an Intermediate Project for members 14 years old and a choice of Six Projects for members 15 years and over.

The re-organization meeting for the Carbon Field Crop Club will be held Monday March 9 at 7:30 p.m. in the Carbon School. All prospective members should attend this meeting.

TARPS FOR TRUCKS

hail storm. I wouldn't be surprised, if in a distance of 20 miles, the price of a tarp was scattered along the road. As well as the grain lost, this is an excellent way to spread weed seeds.

SEED CLEANING PLANT MEETING

The Agricultural Service Board of Starland Municipality has arranged for a meeting to be held in Michichi at 2 p.m. Tuesday March 31st for the discussion of a Municipal Seed Cleaning Plant. Special speaker for this meeting will be Ralph Brown of Acme, adirector of the K.I.B.A. Plant at Beiseker. All interested farmers are urged to attend this meeting.

SPECIAL RELEASE

The Veterinary Laboratory of the Alberta Department of Agriculture has issued a warning regarding the use of iron injections for anemia in baby pigs. There are several injectable iron products on the market now but these vary in available iron content and recommendations regarding "follow up" injections.

Many farmers are using only one injection of low iron content products that call for repeated injections. They do this because they think they are giving a high iron content product that calls for only one or at the most two injections. As a result of this confusion, baby pigs are dying from anaemia or other diseases fostered by anaemia. Much of this could be avoided by reading the labels on the product or consulting the local veterinarian.

Following are services scheduled at Christ Church, Carbon Palm Sunday March 22nd Holy Communion at 11:30 a.m. Service Good Friday March 27 will be in Christ Church at 2:00 Easter Sunday March 29th Holy Communion at 8 a.m. Evening Prayer at 7:30 p.m.

HOW FERTILIZER BOOSTS YOUR PROFIT ON OATS

YOU CAN MAKE UP
TO \$6.00 PER ACRE
MORE!...

Actual field tests show how your net profit per acre of summerfallow oats is boosted by the use of Elephant Brand Fertilizer.

In the table below, note that the increased profit figure takes the cost of fertilizer into consideration. An increased profit of over \$6.00 per acre is certainly worthwhile.

Fertilizer per acre	50 lb. 11-48-0 (Cost \$2.60)
Increased yield per acre	18 bu. (worth \$9.00)
YOUR INCREASED PROFIT PER ACRE	\$6.40
OR \$640.00 ON 100 ACRES	

When properly fertilized, oats grown on stubble land will show an equally profitable return per acre. For greater net profits per acre from any crop on any soil, contact your Elephant Brand dealer listed below for the right information.

It pays to use

Woman's Way

MADELINE LEVASON

"FALSE FEMALE REASONING"

We women sometimes deserve to be called illogical! In my opinion, a prime example of false female reasoning is contained in a recent issue of the Canadian Association of Consumer's "Bulletin."

As an interested member of this organization, which aims to be the voice of the consumer, I strenuously object to its proposals regarding modern cars.

Protesting against car makers' claims that they are producing what women want, the "Bulletin" presents an excellent case against today's costly, flamboyant styling and lack of functional and safety features.

I agree wholeheartedly that new cars are too long, too low, too powerful, too expensive and dangerous and will fill out my CAC Questionnaire to that effect.

However, I do not agree with the CAC proposal that "the government should take direct action to protect the individual from the whim of car designers." I think this too familiar suggestion is nonsensical!

Everytime, we, like silly children, ask the government to "do something" we are surrendering another piece of our freedom. Government controls too many aspects of daily living now.

I don't want a government to tell me what kind of car I can buy any more than I want it to tell me what kind of clothes to wear, food to eat, or where I can live, work or travel. Governments do all these things in countries where individuals have fallen for the false security of controls.

The CAC seems to be forgetting its most effective weapon. Organized protests and pressures have already effected many changes. Consumer preferences are just as important to car makers as they are to meat packers, food producers or appliance makers, and others who have previously bowed to CAC protests.

'Tis well to forget the past because the future will give you plenty to worry about.

Farmers Reap Sweet Harvest Biggest Crop in History

Statisticians point out that Canadians consume 100 pounds of sugar per person annually. The eager delight with which little Diane Lunney (above) embraces her peppermint lollipop lends substantial support to what every parent already suspects: Canada's small fry are regularly engaged in a toothsome effort to raise this statistic.

National Film Board of Canada Photos by Gar Lunney.

Farmers bring their beets to local dumping grounds where they are loaded onto open box cars, carted to sugar factories for refining. Since it made its start at Farnham, Quebec in 1881, Canada's sugar beet industry has grown into an industry of considerable extent and importance until today Canada's sugar production runs as high as 300 million pounds—about one fifth of the country's total requirement of refined sugar.

(The Leader, Davidson, Sask.)

Old hospital to be demolished

The Federal-Provincial committee of Winter Works Projects announced that a request from the Davidson Hospital Board and municipal bodies has been passed for the demolition of the old hospital building. Under the Winter Works legislation the Federal-Provincial authorities will pay 75 percent of the labor cost of such projects. The announcement said the Davidson demolition job would cost \$6,000.00.

Mr. G. D. Bygrave, Chairman of the Davidson Union Hospital Board informed The Leader that the work has started on the demolition job, with Harry Buerkle engaged as supervisor. Workmen will be engaged in the next few days and it is pointed out that only unemployed insurable persons can be engaged under the Winter Works legislation.

It is understood that materials from the hospital building will be salvaged and plans are to use it for a new nurse's residence. We understand also that the Board

plans to convert the present nurse's residence into living quarters for the secretary-manager.

Mr. Bygrave informed us that sundry articles from the old hospital, such as bedside tables, some beds and other furniture, and doors, etc., will be offered for sale at a very nominal price. The old hospital has been heated so that these articles can be seen by anyone interested.—The Leader, Davidson, Sask.

Prevent lockjaw

Immunization against tetanus, commonly called lockjaw, is important, especially so to children on farms. The germs of this agonizing disease usually enter the human body through a wound, sometimes quite a minor one. Farmers, due to their contact with animals and soil, are more exposed to this type of wound infection. Immunization against tetanus is usually given at the same time as those for diphtheria and whooping cough.

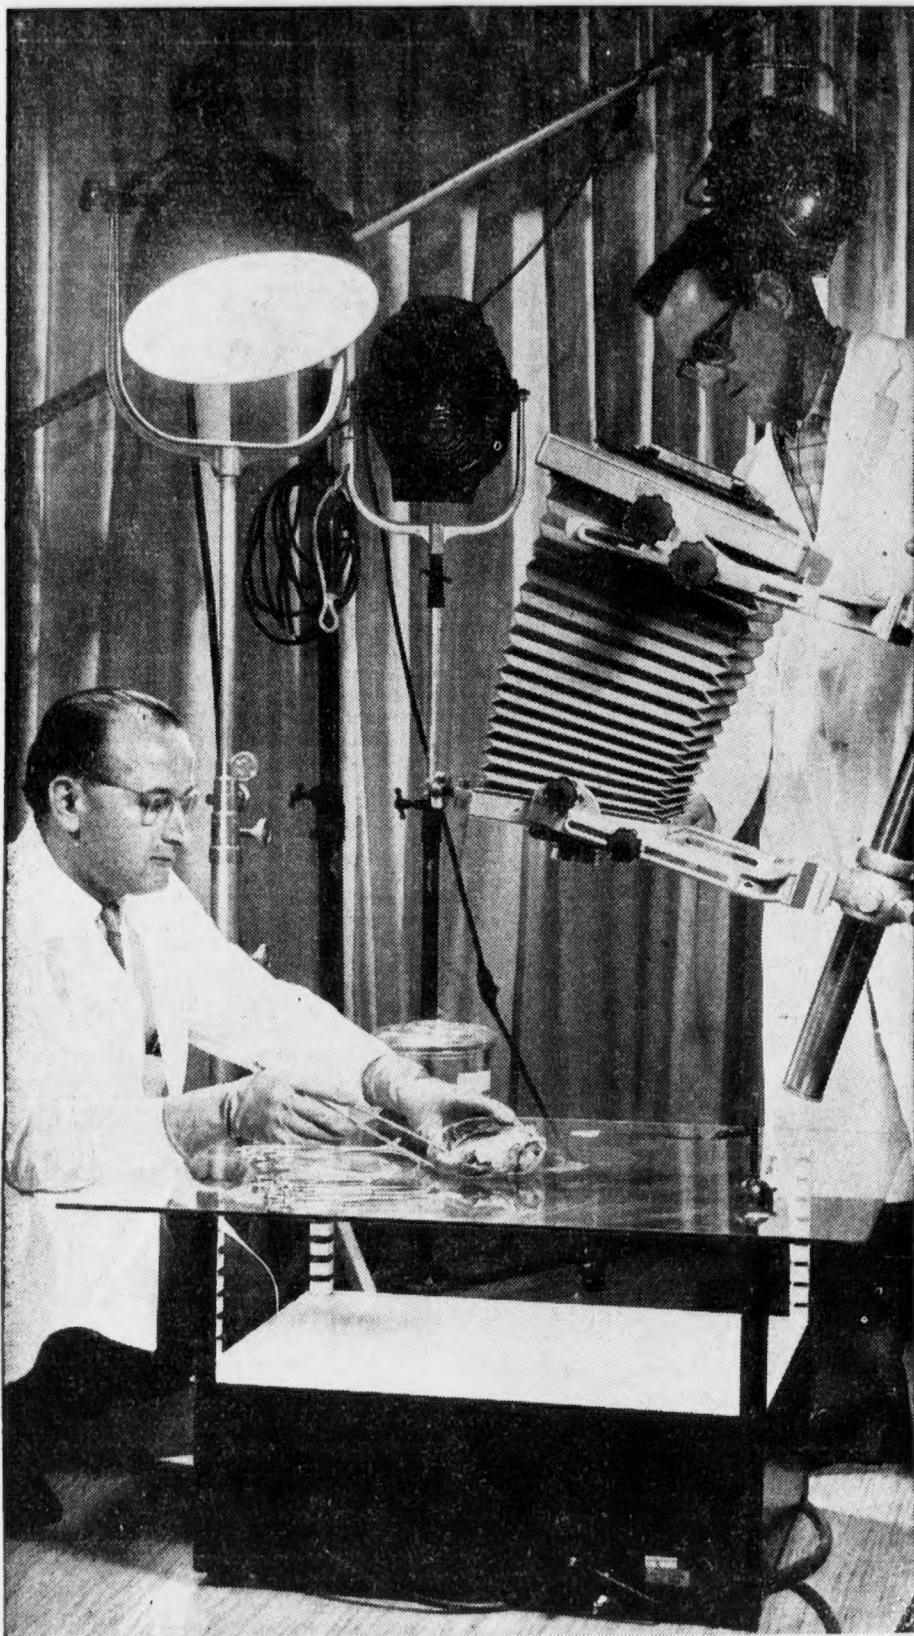

Beth Wendorff of Taber, Alberta holds typical sugar beet—part of Alberta's bumper '58 crop. 535,000 tons of beet roots were harvested from 38,000 acres of irrigated land around Lethbridge. It was largest crop of sugar beets ever grown in Canada; worth \$9 million to Alberta's growers.

Canada has 7 sugar-refining factories: 3 in Alberta, 2 in Ontario, 1 in Manitoba and 1 in Quebec. Sugar content of beets runs around 17%. Adverse weather conditions will reduce sugar content. 1958's record was the result of almost perfect growing conditions.

Designed Exclusively to Serve the Heart

Montreal's Institute of Cardiology

The Montreal Institute of Cardiology houses under one roof all of the trained personnel required to diagnose and treat the wide range of heart diseases together with the most modern equipment obtainable. A photographic department records delicate heart operations in their entirety; still photographs of diseased organs serve as a visual record for the continuous research which is a vital part of the work done at the institute.

The reputation of the Montreal institute, under its Director, Dr. Paul David, has spread throughout the medical world. Doctors and interns come to the centre from China, Roumania, Turkey, Hungary, Switzerland and Italy. Team of specialists above listens simultaneously to beat of patient's heart.

National Film Board of Canada Photos by Chris Lund.

Thanks to modern surgery, many who a few years ago were doomed to early death or a life of semi-invalidism, now undergo treatment with bright hope for a full recovery. The little girl above is one of hundreds treated at Montreal's Institute of Cardiology during the past year.

In Canada, one person out of two dies of a heart disease after the age of 40; doctors note with concern that heart ailments are occurring with increasing frequency among younger people too. Above, nurse checks patient's blood pressure as he treads walking machine.

Morden Curling rink is community effort

A splendid occasion indeed, was the night of January 12.

Invested with a wealth of color, warmth and sparkle, members, visitors, friends—all those who claim kindred in that vast fraternity who curl were present as with the traditional skirl of the bagpipes, the palatial new five-sheet Morden Curling rink was proudly thrown open to the public.

What unseen spectators—what ghosts of past generations who threw oaken blocks upon crude ice, watched in wistful silence as Dr. Herb Bray, whose curling memories span half a century to those old days, took his place to file out upon the ice and throw the first rock?

A time for congratulations. And they were showered aplenty upon those responsible for the advent of this great effort which is at once a pride and a joy of this community: Morden Curling Club and the Curling Association.

The ribbon spanning the broad sheet of ice was cut in ceremonial style by mayor H. A. Cochran and amidst a battery of flashing camera bulbs and lights beneath a canopy of multi-colored pennants, the Morden-Manitou Bonspiel with a record smashing 82 rink entry was off to a flying start.

Henry Loeppky, president of Morden Curling association "who

pays all the bills," admitted rather ruefully that there was still a substantial \$15,000 owing. But he had unanimous agreement from the packed lobby that the debt was amply compensated by his great contribution to the community.

Club executives, well-wishers, visitors from far and near took turns to come to the microphone as master of ceremonies Lloyd Andrews ably handled the matter of introductions in the preliminary ceremonies to the 'spiel.

All who had lent a hand were thanked by Curling club president Denis Loeppky. He particularly thanked the Farmers Curling club and the Ladies club whose "understanding helped to complete the kitchen in time for the opening that evening. He lauded the co-operation received from both executive and club members and added a hope for the installation of artificial ice next year.

To the Association executive "who are paying for this," he added, "I wish you well."

DECREASE

In the first half of 1958 corporation profits in Canada totalled \$722 million, a decrease of 16 percent from the \$864 million earned in the same period of 1957.

DRIVE WITH CARE

Canadian Red Cross policy on mouth-to-mouth artificial respiration

The Canadian Red Cross Society will not encourage the teaching of the mouth-to-mouth or mouth-to-airway method of artificial respiration in its water safety and first aid classes. The many, practical difficulties involved formed the basis of a statement of policy made by Red Cross officials at a press conference in Toronto.

The decision was based on opinions expressed by more than 20 prominent Canadian medical authorities at an Ad Hoc Conference on Artificial Respiration convened by the Canadian Red Cross a short time ago under the chairmanship of Dr. John T. Phair, Honorary Adviser in Public Health for the Society.

Dr. Phair said that the conference had been called as it seemed

desirable at this time to obtain Canadian professional advice about artificial respiration methods on behalf of, not only the Canadian Red Cross Society, but the other training organizations concerned with the teaching of artificial respiration to the lay public. The conference, he explained, gave a full review of the many factors involved in the teaching of the mouth-to-mouth method. The members recognized the effectiveness of this method particularly for infants and very small children when properly performed but concluded that, although the subject is topical, it is not timely and it would be inadvisable to advocate it for general adoption by teaching agencies. On this basis it was the unanimous opinion of the group that the manual methods of resuscitation are still the methods of choice. The conference emphasized that the maintenance of a patent airway is essential for all methods.

Dr. F. C. Monkhouse, Professor of Physiology, University of Toronto, was a member of the Canadian conference and reviewed a report of a similar American symposium he had attended as a delegate of the League of Red Cross Societies and the Canadian Red Cross Society. He said there was considerable interest in the mouth-to-mouth method of resuscitation in the United States but concern as to the practical techniques of teaching the method to the public. Dr. Monkhouse was of the opinion that the American conference placed too much emphasis on the advantages and there was a tendency to overlook the disadvantages.

Dr. W. S. Stanbury, National Commissioner of the Canadian Red Cross Society, explained the Red Cross reasons for not encouraging the teaching of the method and the background for the policy. Since the adoption of the method for infants and children by the American Red Cross Dr. Stanbury said the public may have been led to believe that the mouth-to-mouth method was a panacea for all cases requiring artificial respiration. As a result, there have been many enquiries about the Canadian Red Cross policy on training. He was most concerned that the public might conclude that the manual methods as used by the teaching agencies are outmoded.

Dr. Stanbury stressed that there were very real, practical difficulties, including aesthetic and social considerations, in providing any type of effective training in the mouth-to-mouth method.

Many people reach great heights by putting up a bluff.

DISPLAY SASK. TOURIST EXHIBITS IN U.S.

Saskatchewan tourist exhibits will be on display at the 1959 sports and travel shows in two of the key centres of the American northwest, according to Harvey Dryden, director of the Saskatchewan Government Tourist Branch.

The exhibits will be on display at the 17th annual Sports, Boat and Vacation Show in Des Moines, Iowa, from March 31st to April 5th, and at the 26th annual Northwest Boat, Sports and Travel Show in Minneapolis from March 27th to April 5th.

Mr. Dryden said the purpose of the exhibits, manned by competent government and tourist personnel, is to promote Saskatchewan's various tourist attractions and to distribute tourist information.

Mr. Dryden emphasized that this type of tourist promotion is vitally important in attracting more American visitors to the province this year.

Listen, mum!

Every child has a lot of news that he likes to discuss with Mum and Dad and the rest of the family. His triumphs and troubles at school or at play are to him very important.

Parents should try to give a child their complete attention at some period of the day. A youngster who is "brushed off", because his parents are too busy to be bothered with him, may become convinced that no one loves or wants him. A feeling of insecurity may lead to shyness. His first great need is to feel that his own people love and want him and that to them he is a person of importance. — The Independent, Windthorst, Sask.

Musically Yours

FUTURE PROGRAMS

In previous articles it has been stated that Radio listening is the most important single factor in conditioning the musical tastes of the general public. It should be obvious therefore to anyone who accepts this view, that this power to influence tastes carries with it a great deal of responsibility. However, this responsibility does not rest entirely on the shoulders of those in charge of radio programming. It must be shared by all who are in touch with the medium whether as listeners, advertisers, program directors or record manufacturers.

The listener himself can have a tremendous effect on the quality of the music that is broadcast. There are too many who content themselves with growling about the poor music on the air and let it go at that. When good music is being played on the air give it your support by writing even a short note to your Radio Station expressing your approval.

I should like to add that your own local weekly editor is help-

ing to support the cause of better Radio music by carrying this series of articles in your weekly. These articles are not sponsored by the Station as advertising and are intended only to draw your attention to the obvious need for improving broadcast music and to enlist your aid in bringing this about.

We are hoping in the near future to bring you many new and interesting programs. They may be underway by the time you read this. One will be the Music of All Nations, another will deal with the Western Development Museum, Pionera and the music of the times that many of the articles on display at the Museum were in use.

Still another project slated for this fall will be the demonstration of the music required for piano examinations. This should prove a valuable teaching aid to many music teachers.

These are just three of the musical projects that will be described in the following articles so in the meantime REMEMBER to write to your Radio Station in support of better music.

(The News, Indian Head)

LES JUPP

Big alterations at locker plant

Reconstruction at Indian Head Locker Plant now proceeding is expected to be completed by the end of this month. A major undertaking, the changes being brought about there will present a modern food market. Proprietor Les Jupp decided on the advanced step of remodelling the premises to keep abreast of the times. In the remodelling, a very substantial portion of the floor area will be given over to a complete self-serve food market.

While maintaining the fresh meat department and locker facilities, the plant will also present approximately 1,500 square feet devoted to a full variety of food-stuffs including fresh fruits, vegetables and frozen foods.

Up-to-date equipment is being installed, providing new departments designed for permitting convenient shopping space. The finished premises will be well illuminated and will follow an advanced pattern styled by the Red & White organization, which Mr. Jupp now joins. This is the largest group of independent retailers in North America for these products.

The new store is due to open officially early in March.

Well known in Indian Head district, Mr. Jupp was born in Moose Jaw in 1921. Following senior matriculation, he joined the RCAF in May of 1940. Of his four years overseas, three were spent as a prisoner of war in Germany. On return to Canada, he opened the locker plant in 1946. His business duties have not prevented him from public life activities of the community. He served eight years on the town council and is past president of Indian Head branch Canadian Legion. He is a member of the hospital board and has served for eight years as director of the Saskatchewan Locker Operators' Association and as president for two years.—The News, Indian Head, Sask.

Drinking water air-lift to Belleville Macs

Belleville McFarlands, Canada's representatives in the world hockey championships, had their own supply of familiar drinking water on their European tour.

Thirty-six gallons of specially processed Canadian water was air-lifted overseas. Plans for the shipment were completed following talks between Billy Reay, Belleville assistant general manager, and officials of Canada Dry Limited.

The Macs left Toronto by air for a series of continental exhibition games culminating in the world tournament at Prague and Bratislava, Czechoslovakia, from March 5 to 15.

TCA arranged for delivery of gallon jugs of the water at each centre the McFarlands were scheduled to play. Last year Canada Dry prepared water and rushed it to Whitby Dunlops in Oslo, Norway, following reports of a mild stomach disorder among some players. Processed water of the same type was supplied by the company for the 1957 Royal visit to Canada.

"It is not uncommon," said a Canada Dry spokesman, "for travellers to suffer a reaction from drinking water to which their systems are not accustomed. If we helped the McFarlands avoid this, we were extremely happy."

Editorials from Canadian Weekly Newspapers

Need is great

The need is great. Every day calls come into the offices of the Saskatchewan Division of the Canadian Mental Health Association, from people desperately in need of help, and no one else to turn to.

"My wife is acting strangely. What can I do?"

"I'm afraid of my husband. He gets violently angry and threatens me and the children."

"My sister is coming out of hospital next week. I have no room for her."

"My son locks himself in his bedroom and stays there all day."

"I don't feel well. Can you help me?"

Can you help me? The cry is heard by the Canadian Mental Health Association staff every day, many times a day. There are women who don't want their husbands home from hospital. The Canadian Mental Health Association social worker probes the situation with a view of helping all concerned. There are families who want their relatives out of hospital, against medical advice. They must be handled with firmness and tact. There are patients who want to go into hospital when they don't have to, and patients who don't want to go into hospital when they have to. And the cry is always the same, can you help me?

The Canadian Mental Health Association, with the aid of public volunteer funds, has been able to maintain a trained staff capable of advising, interpreting hospital policy, giving information, acting as liaison between hospital and patient, hospital and family, patient and family, patient and society. It has been able to maintain offices always open to hospital social workers and other personnel who need a place to make their headquarters while in the cities. The doors are always open to distraught frightened people, for whom the world has suddenly and temporarily become too much to handle.

The Canadian Mental Health Association has grown in answer to a tremendous need, and has quickly filled a gaping emptiness in our society. Without it, misery, fright, hopelessness would overwhelm many of us. But the job is barely begun.

There is the necessity of expanding rehabilitation services to reach all parts of Saskatchewan. There is the need for public education, the need for people to know more about the symptoms of mental illness and where help is available. There is the need for more volunteer services of the selfless, devoted kind which asks nothing except to serve. There is the need for more workshops, which have so far proved successful in various parts of Saskatchewan, where people can come with their questions, discuss them with one another and learn together. And behind all this is the greatest need of all, to answer the multitudes of questions raised when someone becomes mentally ill. Why has this happened to my son, my husband, my wife? Why indeed? What causes this great suffering? What goes wrong when an intelligent healthy young person becomes mentally ill? Scientists are trying to find the answers. Saskatchewan psychiatric research, even though conducted with pitifully inadequate funds, has raised the hopes of thousands of patients and their families. Think how much more it could do with five or 10 times the amount that is presently available for their quest.

It all boils down to one thing. The Canadian Mental Health Association needs you, every individual, to become a member, to learn about how we can help the mentally ill, to mature in the knowledge that we can help and that in so doing we are helping society and ultimately ourselves. We can reduce the monstrous waste in money and lives. We can reduce misery and pain. We can help, and as one psychiatrist said: "If I have helped just one human being, then my life has been worth living."

Ruined lives

(The Sun, Grenfell, Sask.)

When a local volunteer canvasser calls at your door this month asking for your financial support for the Canadian Mental Health Association here are some reasons why you should give as generously as you can:

Outside the mental hospitals there are hundreds of thousands of Canadians whose lives are being ruined because of mental sickness. Paralyzing fear and anxiety, uncontrollable hate and hostility, dangerous feelings of depression, personal inadequacy and isolation . . . these are the "minor" symptoms of mental illness leading to personal tragedy . . . broken homes—alcoholism.

This health problem threatens all of us. We are all individuals within a larger community. What affects one, affects all.

Many of the mentally ill can be helped. But there aren't enough community mental health clinics, guidance services and trained people to do the job. Psychiatric research—the vital effort to discover basic causes and better treatment — is hampered constantly by lack of funds and trained personnel.

You helped to make important gains against polio, cancer, tuberculosis. You can help now, against mental illness. Join the Canadian Mental Health Association now. Give to the Mental Health Campaign this month.

LARGEST RAIL TERMINAL

With 280 miles of track in a single yard, Winnipeg has the world's largest rail terminal. The CPR, CNR and three U.S. railways run into the city.

SALES TAX

Since 1949 the revenue collected by the federal government through sales tax on Canadian-manufactured goods has increased from \$390 million to over \$700 million.

ROCKY MOUNTAIN TICK FELS HERD—These cattle are not resting; they have been paralyzed by the Rocky Mountain wood tick shown in the small picture. Of 320 cattle paralyzed by this tick in B.C.'s Nicola Valley in 1957 thirty died. The remainder were saved by removing the ticks from the animals, which usually allows rapid and complete recovery. Presumably paralysis is caused by a toxin. In the small picture a blood engorged female Rocky Mountain tick is shown below with male, top right, and unfed female below.

Vicious toxin unidentified

World scientists are going all out in an attempt to solve the mystery of the wood ticks, some of which have the means of paralyzing cattle and humans alike.

Less than two years ago, the Rocky Mountain wood tick killed 30 rangeland cattle in British Columbia while paralyzing 290 others. And in the same province, over 250 human cases of tick paralysis have been reported, of which 28 proved fatal.

Researchers foiled

Researchers in Europe, Africa, Australia and North America are trying to determine what powers the tick possesses. Tick sputum has been collected in tubes the size of a pin and spread over isolated nerve cells.

But so far, attempts have failed. It is known that certain species of ticks may cause ascending fatal paralysis in man and livestock and that their removal usually brings about rapid and complete recovery. Presumably the causative agent is a toxin. Its isolation and analysis could lead to the finding of an anti-toxin, could make a new drug available for medical use, and could contribute to the various theories of nerve functioning.

Recent advances in the studies of tick paralysis have been made at the Federal Veterinary and

life, they are likely to thrive where ground cover permits the presence of rodents. Ranchers are therefore urged to deliberately pasture an area with adequately sprayed cattle. Thus grass is utilized and rodents reduced, and most of the adult ticks killed by the insecticide on the animals.

"These observations, together with the discovery that the tick population in a given locality may gradually increase or decrease, seemingly from factors that have involved the feeding and disposition of adult ticks, lend encouragement to the belief that tick populations can be effectively suppressed by control measures," says Dr. Gregson.

Medical Entomology Laboratory at Kamloops, B.C.—where the Rocky Mountain tick appears to cause paralysis more readily than the species to the east or south.

Cemented on

Linked with the study of the effect of the tick are studies of the feeding mechanism of the tick itself. They have shown that the tick does not burrow in, but cements itself to the skin of the host and, once attached, alternately sucks blood and pumps fluid into the tissues. Attempts to demonstrate a toxin in this fluid have failed.

Laboratory-raised ticks attach themselves to a host, but do not engorge as readily as "wild" ticks, which, says Kamloops Entomologist Dr. J. D. Gregson, leads to the belief that climate participates in "conditioning" ticks for their normal two months of spring activity and may even play a part in the varying powers of the ticks to produce paralysis.

Modern insecticides have advanced methods of chemical control since the days of treating animals with creosote, lard and crankcase oil. Best of these modern chemicals, according to Dr. Gregson, is benzene hexachloride and a spray of Ortho W 10 BHC applied at the rate of four ounces per gallon of water to the head and shoulders offers protection.

Hard to control

Elimination of ticks is difficult since a percentage of the ones failing to find a host will remain dormant and reappear the following spring. Because of this, and the fact that the shortest period from egg to maturity is two years in nature, control measures will not bring about immediate results.

And, because ticks feed on wild-

Ready for anything

After making his seven-day simulated air trip to the moon, Airman Don Farrel repeated the offer he had made before that "take-off" — "I would really and truly like to make that first trip to the moon. I'm available if they want me."

Reports tell of 1,300 volunteers in Russia for the first trip to outer space. Where are the masculine Christian young men "available" for those vast un-entered areas within a few hours' flight, where Christ has never been named?—The War Cry.

The manufacturing industry provides the largest single segment of Canada's labor income, about one-third of the total.

New trophy for marksmanship competition donated to Army

A new trophy for marksmanship competition by the six infantry regiments of the Regular Army has been donated to the army by the late Brigadier A. Hamilton Gault, DSO, CD, who died last November.

Founder of the famed Princess Patricia's Canadian Light Infantry and one of Canada's most notable soldiers, Brig. Gault was always an enthusiastic advocate of rifle marksmanship. He considered that a unit is "only as good as its marksmanship."

The trophy, featuring a silver figure of a Canadian soldier firing the FN rifle, is believed to be the first trophy to portray the new weapon.

The figure is mounted on a base of Kentucky walnut, the wood used in the manufacture of the FN rifle. The lower portion is bordered with design in maple leaves on which will be inscribed the names of winning units. The upper portion bears a plate inscribed with the donor's name, and the cap badges of the six infantry regiments, worked in silver.

To be formally presented to the Canadian Army later this year by Mrs. A. Hamilton Gault, the trophy will be offered annually to the infantry battalion finishing on top in a rifle shooting competition involving all its members and not merely a few crack shots.

First unit to win the trophy, and whose name will be inscribed is the 2nd Battalion, The Black Watch (Royal Highland Regiment) of Canada, who earned this honour in the first competition, held in 1958.

Conditions of the award were drawn up under the personal supervision of Brig. Gault, who was one of Canada's most distinguished soldiers and citizens. With a military record dating back to 1900 when he enlisted in the army for service in the South African War, he raised and

equipped Princess Patricia's Canadian Light Infantry for service in the First World War at his own expense.

Wounded three times in action, he lost a leg and was decorated for gallantry by Great Britain, Russia and Belgium. His interest in the unit he founded continued between two world wars and in 1940 he was again recalled to active service.

In 1956, the Department of National Defence honored him by naming the Edmonton home of the 1st Battalion, PPCLI, the Hamilton Gault Barracks, and three months before his death in November 1958 he was appointed the Princess Patricia's first Colonel of the Regiment.

Engraved watch to Co-op oil agent

Mr. M. Bayduk is the recipient of a watch as a winner in the Co-op Petroleum Sales Contest for 1958. He is manager of the Watson branch of the Co-op.

A letter from Federated Co-operatives Limited to Mr. Bayduk says in part:

"Your Co-operative was one that came out on top as a Winner in the Petroleum Sales Gallonage Contest for 1958. Under separate cover we are forwarding to you a Watch engraved 'Co-op Petroleum Sales Contest 1958.'"

"We would like to take this opportunity of extending our congratulations to you for a job well done."

"We would like to thank you for your efforts and hope you will help to make 1959 another banner year." — The Witness, Watson, Sask.

Interest on the public debt incurred by the federal government costs Canadians more than \$10 million a week.

It's election time—Canada—1980

... and here is the beginning of responsible government, in the cradle of its origin—the classroom. These are the lawyers, the doctors, the teachers, the statesmen and scientists, the business leaders of tomorrow.

The important thing is that we have enough blackboards in enough classrooms to take care of our future crop of leaders. And the need is getting greater every year.

In Canada today, we now have more than 5½ million children under 15 years of age. To educate them properly we are going to need 9,000 more teachers immediately and upwards of 38,000 additional classrooms over the next 10 years.

You can help. Write today for the booklet listed below.

Winners named in fire contest

Five Manitoba communities have won recognition for their awareness and observance of fire safety prevention week, H. E. Puttee, provincial fire commissioner, said.

The contest was sponsored by the Fire Prevention and Clean-up Campaign Committee of the National Fire Protection Association (International). It was designed to stimulate universal fire safety consciousness and to encourage municipalities to use Fire Prevention Week as a "springboard" for year-round fire prevention programs at the community level.

Here are the Manitoba winners: Class B—cities with a population between 25,000 and 99,000—Brandon.

Class C—cities and towns between 10,000 and 24,000—Transcona first, Flin Flon second.

Class E—towns between 2,500 and 4,900—Neepawa.

Class F—towns under 2,500—Gilbert Plains.

Turkey industry growing

"From all indications," says E. M. (Ted) Campbell, Poultry Commissioner with the Animal Industry Branch of the Saskatchewan Department of Agriculture, "the turkey industry appears to be in for another year of expansion."

"Competition will undoubtedly be keen," Mr. Campbell went on, "and turkey farmers must make a greater effort to use all the tools of good

E. M. Campbell

management in order to realize a profit out of their turkeys this year."

Growth of the turkey industry is reflected in figures which Mr. Campbell quoted just recently.

"Approximately 48,000 turkeys have been banded this year in Saskatchewan under the Saskatchewan Hatchery Supply Flock Policy administered by the Provincial Department of Agriculture," he noted. "A year ago, 40,000 turkeys were banded under the policy."

This increase becomes noteworthy when it is realized that turkey flock owners who qualify under this Policy are eligible to ship hatching eggs to commercial hatcheries in the Province for the production of turkey poults.

Consequently the increase in the number of banded birds from 40,000 to 48,000 represents an increase of 21 percent; during 1958, 1,263,536 poults were hatched in the province. Of this number, approximately 20 percent were from imported hatching eggs and poults.

With the increasing number of birds banded this year, it would appear that Saskatchewan will have a more adequate supply of turkey hatching eggs.

Steps were taken to control disease in these birds. Mr. Campbell reports that all birds banded were tested for CRD and Pullorum Disease.

"It was found this year that the incidence of CRD has been substantially reduced and according to present tests, all flocks qualifying under the Policy are free of the disease," he said.

"Pullorum Disease has been detected in some flocks but with additional testing this has been reduced to a minimum," states Mr. Campbell.

All of which adds up to more and healthier birds in Saskatchewan; a sign of continued expansion and a sign that turkey growers will have to exercise good management practices if they are to realize a profit from their endeavors.

If you wish to be perfect, follow the advice that you give others

Supper delight: SALMON CHEESE BRAID

Break up with a fork
1 can (7 oz.) salmon

Sprinkle with
1/4 tsp. pepper
1/4 tsp. celery salt
3/4 c. shredded process cheese
1 tbsp. finely-chopped onion
1/2 c. finely-chopped celery
2 tbsps. chopped parsley

Mix in
1/4 c. condensed mushroom soup

Sift into bowl

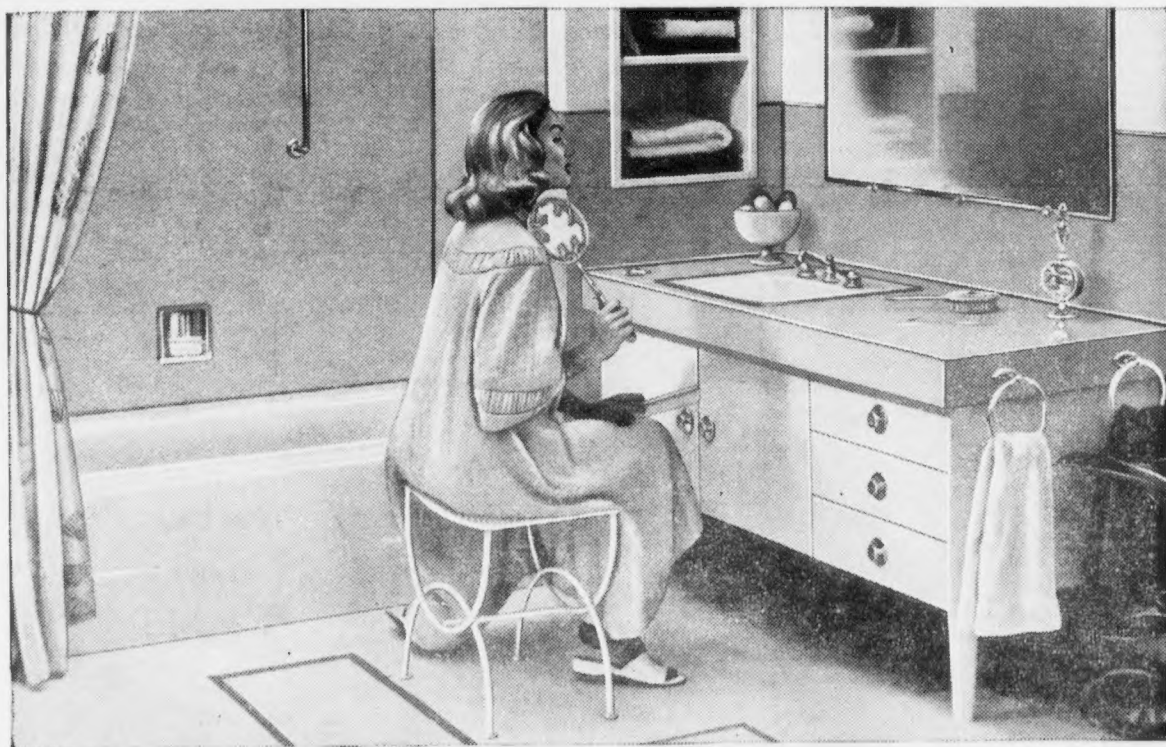

1 1/4 c. once-sifted all-purpose flour
or 2 c. once-sifted pastry flour
4 tsp. Magic Baking Powder

1/2 tsp. salt
Cut in finely
1/2 c. chilled shortening
Make a well in dry ingredients; mix in
3/4 c. milk

Add more milk, if necessary to make a soft dough. Turn out on floured board, knead 10 secs. Roll into a 9 x 12" rectangle. Spread centre third lengthwise with salmon filling. Make 11 slashes 1" apart, in each side of dough, cut from filling to outside edge. Fold strips at an angle across filling, alternate one side, then the other.

Seal ends. Place on greased cookie sheet. Bake at 400°, 25 to 30 mins. For sauce, heat together 1/4 c. milk, remainder of 10-oz. can mushroom soup and 1/2 c. shredded process cheese. For best baking results, use Magic.

PHILLIPS FOR BEAUTY
206 Kerr Block Regina, Sask.

Level Land

Mrs. Percy Paul (nee Ina L. Huether) daughter of Mr. and Mrs. Albert Huether of Carbon is home on a short visit with her husband and family before leaving for Java, Indonesia.

Mr. Paul, formerly of Sask. and more recently of Lansing, Michigan, received his Master of Arts degree from Michigan State University. Mr. Paul has been principal of the Milwaukee Jr. Academy and the Lansing Jr. Academy during the last seven years. This past fall and winter Mr. Paul has headed up the Biology Dept. at Grand Ledge Academy in Michigan. Mr. Paul has just recently been appointed Professor of Education at the Union Seminary, Bandung, Java, Indonesia.

"Liquor kills the living and preserves the dead", said Rev. Truman Northup from Irricana who spoke at the worship hour at the Seventh-day Adventist church Sat. Feb. 28.

Throughout the world, Seventh-day Adventists renewed their annual efforts to stem the liquor traffic by pledging to personally abstain from alcohol in any form and by sending the L'ISTEN magazine to prominent leaders in their community who might equally cast their influence against the evil of liquor.

The Rosebud S.D.A. church will conduct its annual week of prayer for the youth in its church during March 14-21; "the church that neglects its youth will find its youth neglecting the church", said pastor R. R. Patzer.

Mr. and Mrs. Ed Beck and family of Acme were weekend visitors to the S.D.A. Church. Other weekend guests were Sharon Bechtold and Lawrence Ford of Calgary; Mr. and Mrs. Joe Trenchuk of Edmonton; Mr. and Mrs. A. A. Roth, Mr. and Mrs. Sam Huether and Mr. Reinhold Huether of Calgary; Mr. and Mrs. W. A. Black of Gallotone Gateway, Montana.

Mr. Percy Paul, enroute to Java, was guest speaker Mar. 7.

The Seventh-day Adventist group are finishing the Auditorium this spring. They are laying a hardwood maple uoor which will be finished by the time this goes to press. The volunteer turnout is very good and the building committee thanks everyone for the help.

A farewell was given for Mr. and Mrs. Percy Paul and family in the S.D.A. Church on Wednesday March 11. A very interesting program was arranged and a gift of cash was presented from the community.

Acme

The Active Sewing Circle met March 5th at the home of Mrs. Rosenke. Nine members and one visitor were present. Lunch was served by Mrs. Rosenke and Mrs. Brown. The next meeting will be on April 9th at the home of Mrs. Tan-

ton. Mrs. Tyess and Mrs. Gibson will serve.

BORN—To Mr. and Mrs. Joe Richter of Forest Lawn, a 7 lb. 13 oz. son, Rocky Lane March 2nd.

BORN—To Mr. and Mrs. Vern Hanson, a son Brooks Vernon on Monday March 9th in Holy Cross Hospital. Congratulations.

All those interested in Badminton please be at the Acme School Gym Monday March 23 at 7 p.m. Please bring your running shoes. Adults only.

Mr. and Mrs. Jake Merkosky of Port Arthur, Ontario were visitors at the home of his brother Alex.

Mrs. Mattern is a Seattle visitor with relatives.

Sorry to hear Mrs. Sutherland is back in hospital.

Ring central with button in. Wait one full minute, then if no reply from central ring again not pushing button. Always ring off at completion of a call. Do not use telephone during an electric storm unless emergency.

Rural line 1 on the Acme Exchange is now 30.

The Ladies' Bridge Club met at the home of Irene Loggin Thursday evening March 5th. High score was held by Frances McCulloch with second going to Eva Park. Next bridge will be held at the home of Eva Markham on Thursday March 19th.

The Semi-final elimination public speaking contest of two Acme Students for the United Nations Pilgrimage for Youth will be held April 3rd at 8 p.m. in the Acme Memorial Hall Lodge Room. Everyone welcome. Lunch will be served.

Annual meeting of Acme Curling Club will be held at the Curling Rink Saturday Mar. 21 at 7 p.m. All curlers interested be in attendance. Oyster Supper, etc. will be first item of business.

Congratulations to Mrs. A. R. Gail who was elected Vice President of the Rebekah Assembly of Alberta.

The regular C.W.L. meeting of Acme-Swalwell members was held on Tues. Mar. 10 in the church at Swalwell. There was a good attendance and we decided to serve for the coming banquet for James Hagel to be held on Saturday May 23 at Beiseker. Convenors Mrs. W. MacDonald, Mrs. L. Lavoie.

Our bake sale to be held on Saturday April 4th at 2:30 p.m. at Collinge Store will be in charge of Mrs. John Leyten and Mrs. C. Helgren. The raffle to be held also will be in charge of Mrs. A. Kostrosky.

The annual banquet to be held this year in Acme was tabled for April meeting for further discussion. This meeting will be held on the 9th at 8 p.m. at the home of Mrs. C. H. Otten with Mrs. A. Kostrosky as co-hostess. There will also be election of officers at this meeting.

LINDEN

We're glad to hear that Wes Ratzlaff is doing fine after undergoing surgery in the Three Hills Hospital and will be home one of these days.

Mr. and Mrs. Frank Penner and daughters Irene and Sarah have left for Morris, Manitoba for a short visit.

Curtis Baerg, Kenneth Reimer and Walter Unruh have left for Tucumcari, N. M. to attend a two week course in Bible Study.

BORN—To Mr. and Mrs. Norman Klassen, a daughter Maxine Lynn. Congratulations.

Dr. H. M. ELLIOTT SCHOOL
The final score of the baseball game between the school

team and the visiting team last Friday afternoon was a tie of 12-12.

The grade 7 and 8 class is taking the St. John's First Aid course every Wednesday afternoon under the supervision of Miss Irene Penner and Mrs. Terence Toews.

Mr. Alvin Unruh is instructing on a similar course for adults Tuesday evenings at the school.

...so both are borrowing from a bank

Faced with unforeseen household expenses? Want to make some special major purchase? Need money for taxes—or to meet a family emergency? Personal loans to help people meet just such situations are being made by the chartered banks every day. You're not asking a favour when you visit a chartered bank to arrange a personal

loan. The manager welcomes opportunities to make loans, repayable out of earnings in convenient instalments. And at a chartered bank, you can always count on privacy and courteous consideration, whether you are arranging a loan or using other valuable services the bank provides.
